

Considering a Microcomputer?

Be Sure to Check Out the Product Offerings of the World's Largest Full Line Microcomputer Company.

All Ohio Scientific machines come with microcomputing's fastest full feature BASIC-in-ROM or on-Disk for instant use.

Challenger I Series

Economical computer systems that talk in BASIC. Ideal for hobbyists, students, education and the home.

	Minimum Configuration	Base Price
Superboard II — World's first complete system on a board including keyboard, video display, audio cassette, BASIC-in-ROM and up to 8K RAM	4K RAM	\$ 279
Challenger IP — Fully packaged Superboard II with power supply	4K RAM	\$ 349
Challenger IP Disk — Complete mini-floppy system expandable to 32K RAM	16K RAM	\$1190

Challenger IIP Series

Ultra high performance BUS oriented microcomputers for personal, educational, research and small business use.

C2-4P — The professional portable	4K RAM	\$ 598
C2-8P — The world's most expandable personal machine for business or research applications	4K RAM	\$ 799
C2-4P Disk — The ultimate portable	16K RAM	\$1464
C2-8P Single Disk — Ideal for education, advanced personal users, etc.	16K RAM	\$1738
C2-8P Dual Disk — Most cost effective small business system	32K RAM	\$2597

Challenger II Serial Interface Series

Same great features as Challenger IIP Series for those who have serial terminals: small business, education, industry.

C2-0 — Great starter for users with a terminal	4K RAM	\$ 298
C2-1 — Great timeshare user accessory; cuts costs by running simple BASIC programs locally	4K RAM	\$ 498
C2-8S — Highly expandable serial machine, can add disks, etc.	4K RAM	\$ 545

Challenger III The Ultimate in Small Computers

The unique three processor system for demanding business, education, research and industrial development applications.

C3-S1 — World's most popular 8" floppy based microcomputer	32K RAM	\$3590
C3-OEM — Single package high volume user version of C3-S1	dual floppys	\$3590
C3-A — Rack mounted multi-user business system directly expandable to C3-B	48K RAM	\$5090
C3-B — 74 million byte Winchester disk based system. World's most powerful microcomputer	dual floppys	\$11,090

OHIO SCIENTIFIC also offers you the broadest line of expansion accessories and the largest selection of affordable software!

Compare the closest Ohio Scientific Model to any other unit you are considering. Compare the performance, real expansion ability, software and price, and you will see why we have become the world's largest full line microcomputer company.

The C2-4P
The Professional Portable by Ohio Scientific

Ohio Scientific now offers you the world's most powerful portable personal computer in both BASIC-in-ROM and mini-floppy configurations.

C2-4P Mod 2 Standard Features:

- Minimally equipped with 4K BASIC-in-ROM, 4K RAM, machine code monitor, video display, cassette interface and keyboard with upper and lower case characters, video monitor and cassette recorder optional.
- The fastest full feature BASIC in the microcomputer industry.
- The C2-4P Mod 2 features the most sophisticated video screen in personal computing with 32 rows by 84 columns of upper, lower case, graphics and graphics and graphics characters in an effective screen resolution of 256 x 192 elements.
- The C2-4P disk system is built with its ultra fast BASIC and high resolution, makes the C2-4P capable of handling video information directly in BASIC.
- The C2-4P features computer BASIC architecture. It minimally utilizes 8 state hardware. Two slots are used in the base machine leaving 2 slots open for expansion.

- Comes fully assembled and tested. BASIC and machine code are always accessible immediately after power-up.
- A new high density static RAM board and bus expansion capability without sacrificing portability.
- The C2-4P offers the user maximum performance in a portable package. This performance makes the C2-4P suitable for use in home computing, education, business and research and small business applications.

Other small personal computers can satisfy the requirements of the computer novice, but no other personal portable can match the C2-4P in professional and computer oriented applications.

The C2-8P
An exceptional value in personal computing

If you are interested in an ultra high performance personal computer which can be fully expanded to a mainframe class micro-computer system, consider the C2-8P.

Features:

- Minimally equipped with 8K BASIC-in-ROM, 4K RAM, machine code monitor, video display interface, cassette interface and keyboard with upper and lower case characters, video monitor and cassette recorder optional.
- The fastest full feature BASIC in the microcomputer industry.
- Offers the most sophisticated video display in personal computing with 32 rows by 84 columns of upper, lower case, graphics and graphics characters in an effective screen resolution of 256 x 192 elements.
- The C2-8P direct screen access, coupled with its ultra fast BASIC and high resolution, makes the C2-8P capable of handling video information directly in BASIC.
- Fully assembled and tested. It also maintains class microcomputer, no open slots for expansion. Supports Ohio Scientific's ultra low cost dynamic RAM boards of ultra high resolving static RAM.

- The C2-8P can support more in core expansion than its four nearest competitors combined.
- The C2-8P is the only BASIC-in-ROM computer that can be directly expanded today to a complete business system with the greatest 8" floppy disk drive.
- It is the only personal class computer that can be expanded to support a hard disk (C2-8P).
- The C2-8P is the fastest in BASIC, has the most sophisticated video display and the most internally expanding personal computer. Therefore, it should be the highest priced!

Writing: The C2-8P is priced consistently below several models mentioned in this magazine. The C2-8P is one of several models of personal computers, by Ohio Scientific, the company that leads off in full feature BASIC-in-ROM personal computers.

The C3-B
by Ohio Scientific
The world's most powerful microcomputer system is far more affordable than you may think.

STANDARD FEATURES:

- 74 million byte Winchester technology disk drive maintains class file access speeds and capacity.
- High level data file software makes high performance file structures like multikey ISAM easy to use.
- Triple processor CPU with 6602A, 6900 and Z80 gives the programmer the best of all worlds in performance and versatility.
- The included 6602A based extended disk BASIC by MicroSoft (MS-DOS) is available, including 4 MHz Z80 and LS11 with extended arithmetic.
- disk of high reliability static RAM is standard.
- High density 8" floppys provide program and data mobility from machine to machine.
- Completely integrated mechanical system with UL-recognized power supplies, continuous duty cycle cooling, modular construction and rack side mounted subassemblies.
- Based on a 16 slot bus-oriented architecture with only 2 slots used in the base machine.
- Directly expandable to 300 megabytes of disk, 800K of RAM in 16 partitions, 16 communication ports, plus console and three printers.
- C3-B's have been in production since February, 1976, and are available now on very reasonable delivery schedules.
- The C3-B was designed by Ohio Scientific as the state of art in small business computing. The system places its power where it's needed in the small business environment, in the data files. The C3-B's advanced Winchester technology disk, coupled with its smart floppy disk controller and dedicated memory channel, gives the C3-B data file performance comparable with today's most powerful main computers.
- Yet, the C3-B costs only slightly more than many floppy only computers but offers at least a thousand times performance improvement over such machines (50 times storage capacity multiplied by 20 times access speed improvement).
- But what if your business client cannot justify spending with a C3-B?

Then start with Ohio Scientific's inexpensive C3-B1 floppy disk based system (MS-DOS). When it's ready, add the C2-74 big disk and directly transfer programs and files from floppy to big disk with "NO" modifications.

That's upward expandability! "Back as shown above complete with 74 megabyte disk, dual floppy, 48K of static RAM, OS/2 operating system and one CRT terminal under \$35,000.

Multiple terminal systems with printers and applications software are priced in the mid 20's.

The OSI 48 Line BUS

OHIO SCIENTIFIC offers the broadest line of BUS compatible micro-computer boards. This line includes several new and exciting products which are not available anywhere else, such as a three processor CPU board, dual port memories and a multi-processing CPU expander.

OHIO SCIENTIFIC has delivered approximately 100,000 boards based on our 48 line BUS and is now delivering thousands per week in 17 models of computers and dozens of accessories.

OHIO SCIENTIFIC'S BUS design incorporates high band width, high density and mass production technology to achieve a truly remarkable performance to cost ratio.

Here is just a sampling of the many OSI 48 BUS compatible boards available for the systems user, prototyper, OEM user and experimenter.
